EDUCATION

JADAVPUR UNIVERSITY

BACHELOR IN ENGINEERING, COMPUTER SCIENCE

July 2018 - April 2022 | Kolkata, India

Expected graduation: June 2022

Cum. GPA: 9.1 / 10.0

EXPERIENCE

AMAZON | SDE-2

July 2022 - Present | Hyderabad, India

- Implemented and designed a UX feature on Amazon Business Detail Page with dynamic data for customers to add multiple products to cart.
- Implemented and designed multiple components incorporating microservices architecture for vending AI generated data on Amazon Business Detail Page

MENTOR GRAPHICS | SDE INTERN

Jan 2022 - June 2022 | Noida, India

- Implementation and design of C++ module for parsing liberty files and using the parsed information to do accurate inferencing on the EDA visualizer for components like flip-flops, latches, and different kinds of logic gates. Stress was given to the optimization of space and time and code maintainability so that the module can be scaled when needed.
- Designed different classes for integration of the liberty parser on the visualizer side code-base for the different gates and components to be inferred on the schematic window.

AMAZON | SDE INTERN

June 2021 - July 2021 | Hyderabad, India

(2 months Virtual Internship)

- Design and development of a carousel feature on the Detail Page of Amazon for Business customers and hence improving the user experience.
- Involved concept and class design for the spring back-end, and design and implementation of the front-end based APIs.
- Emphasis was given on increasing high code standards, technical documentation, increasing the code coverage (increased up to 95.7%) and including user experience research methodologies such as A/B testing.

INDIAN INSTITUTE OF TECHNOLOGY, BOMBAY |

RESEARCH INTERN

April 2020 - June 2020 | Virtual

- Implementation of adversarial models in PyTorch to classify Covid-19 affected XRAYs and non-affected samples using deep domain adaptation, and distilling knowledge of large models trained on chest-xray datasets.

TECHNICAL PROJECTS

PERSONAL PORTFOLIO

Personal Website made with ReactJS

- A personal portfolio website made with ReactJs and tailwindCSS based on the theme of MacOS.

FLAMUP

A ReactJs website with Spring Boot Backend

- A ReactJs website using MaterialUI for showcasing fashion items where user can browse and order items.
- Handled pagination both from frontend and backend and configured docker for easy deployment.

BUDGIFY

React Native Based Android App

- An app to track one's personal expenses and to schedule future bill payments.
- Learnt the deployment process of android apps, and improving according to user feedback.

COURSEWORK

GRADUATE

- Computer Networks, Computer Organization and Architecture, DBMS, OOP in Java and C++, Functional Programming, Lambda Calculus, Computer Graphics, Operating Systems, Cryptography and Network Security, Data Mining, Deep Learning, Bioinformatics, Machine Learning.

SELECTED PUBLICATIONS

- [1] S. G. Dastidar, K. Dutta, N. Das, M. Kundu, and M. Nasipuri. Exploring knowledge distillation of a deep neural network for multi-script identification. In *International Conference on Computational Intelligence in Communications and Business Analytics*, pages 150–162. Springer, 2021.

ACHIEVEMENTS

- 4-star coder on Codechef, Intermediate Problem Solver on Hackerrank
- Winner of Smart India Hackathon among 10000 other teams across India
